- Kinetic energy  $K = \frac{1}{2}mv^2$
- Gravitational potential energy  $U = mgy$

# Energy Conservation

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

- Kinetic energy  $K = \frac{1}{2}mv^2$
- Gravitational potential energy  $U = mgy$
- Conservation of energy means that these two are equal

# Energy Conservation

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

- Kinetic energy  $K = \frac{1}{2}mv^2$
- Gravitational potential energy  $U = mgy$
- Conservation of energy means that these two are equal

$$\frac{1}{2}mv^2 = mgy \Rightarrow v = \sqrt{2gy}$$

# Energy Conservation

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

- Kinetic energy  $K = \frac{1}{2}mv^2$
- Gravitational potential energy  $U = mgy$
- Conservation of energy means that these two are equal

$$\frac{1}{2}mv^2 = mgy \Rightarrow v = \sqrt{2gy}$$

- We can substitute this into the last equation

# Pythagorean Theorem

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

$$ds^2 = dx^2 + dy^2$$

$$ds^2 = dx^2 \left( 1 + \left( \frac{dy}{dx} \right)^2 \right)$$

$$ds^2 = dx^2 \left( 1 + \left( \frac{dy}{dx} \right)^2 \right)$$

$$ds^2 = dx^2 (1 + y'^2)$$

$$ds = dx \sqrt{1 + y'^2}$$

# More About Lagrangians

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

**Lagrangians**

- Let the Lagrangian be

$$\mathcal{L} = \sqrt{\frac{1 + y'^2}{2gy}}$$

# More About Lagrangians

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

- Let the Lagrangian be

$$\mathcal{L} = \sqrt{\frac{1 + y'^2}{2gy}}$$

- Remember that  $y = f(x)$

$$\mathcal{L}(x) = \sqrt{\frac{1 + f'(x)^2}{2gf(x)}}$$

- $f'(x) = \frac{df(x)}{dx}$  (Lagrangian notation)

# Least Action Principle

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

- We need to choose  $f(x)$  minimize the time

$$t_{12} = \int_{P_1}^{P_2} \mathcal{L}(x) dx$$

# Least Action Principle

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

- We need to choose  $f(x)$  minimize the time

$$t_{12} = \int_{P_1}^{P_2} \mathcal{L}(x) dx$$

- Any ideas?

# Least Action Principle

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

- We need to choose  $f(x)$  minimize the time

$$t_{12} = \int_{P_1}^{P_2} \mathcal{L}(x) dx$$

- Any ideas?
- Euler-Lagrange equation

$$\frac{d}{dx} \left( \frac{\partial \mathcal{L}}{\partial f'(x)} \right) = \frac{\partial \mathcal{L}}{\partial f(x)}$$

# Partial Derivatives

Brachistochrone

$$\frac{\partial f(x, y)}{\partial x} = 2$$

$$\frac{\partial f(x, y)}{\partial y} = 3$$

# Lagrangians

## Beltrami's Identity

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

$$\frac{d}{dx} \left( \frac{\partial \mathcal{L}}{\partial f'(x)} \right) = \frac{\partial \mathcal{L}}{\partial f(x)}$$
$$\mathcal{L}(x) = \sqrt{\frac{1 + f'(x)^2}{2gf(x)}}$$

# Lagrangians

## Beltrami's Identity

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

$$\frac{d}{dx} \left( \frac{\partial \mathcal{L}}{\partial f'(x)} \right) = \frac{\partial \mathcal{L}}{\partial f(x)}$$
$$\mathcal{L}(x) = \sqrt{\frac{1 + f'(x)^2}{2gf(x)}}$$

- Anyone want to do this???

# Lagrangians

## Beltrami's Identity

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

$$\frac{d}{dx} \left( \frac{\partial \mathcal{L}}{\partial f'(x)} \right) = \frac{\partial \mathcal{L}}{\partial f(x)}$$

$$\mathcal{L}(x) = \sqrt{\frac{1 + f'(x)^2}{2gf(x)}}$$

- Anyone want to do this???
- Time for a trick: Beltrami's Identity
  - Notice that  $\mathcal{L}(x)$  doesn't *explicitly* depend on  $x$

$$\mathcal{L} - f'(x) \frac{\partial \mathcal{L}}{\partial f'(x)} = C$$

# Lagrangians

## Using Beltrami's Identity

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

$$\begin{aligned}C &= \mathcal{L} - f'(x) \frac{\partial \mathcal{L}}{\partial f'(x)} \\ \frac{\partial \mathcal{L}}{\partial f'(x)} &= \frac{f'(x)}{\sqrt{(2gf(x))(1 + f'(x)^2)}} \\ C &= \frac{1}{\sqrt{2gf(x)(1 + f'(x)^2)}} \\ \frac{1}{2gC^2} &= f(x)(1 + f'(x)^2)\end{aligned}$$

# Lagrangians

## Solution

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

**Lagrangians**

$$\frac{1}{2gC^2} = f(x) (1 + f'(x)^2)$$

# Lagrangians

## Solution

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

$$\frac{1}{2gC^2} = f(x) (1 + f'(x)^2)$$

- So what's the solution???

# Lagrangians

## Solution

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

$$\frac{1}{2gC^2} = f(x) (1 + f'(x)^2)$$

- So what's the solution???
- It can be shown that this is a cycloid curve

# Lagrangians

## Solution

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

$$\frac{1}{2gC^2} = f(x) (1 + f'(x)^2)$$

- So what's the solution???
- It can be shown that this is a cycloid curve
- Has to be parametrized

$$x(\theta) = \frac{1}{4gC^2} (\theta - \sin \theta)$$

$$y(\theta) = \frac{1}{4gC^2} (1 - \cos \theta)$$

# Lagrangians

## Solution

Brachistochrone  
Problem

Rajeev Atla

Administrivia

Definitions

Getting Started

Lagrangians

$$\frac{1}{2gC^2} = f(x) (1 + f'(x)^2)$$

- So what's the solution???
- It can be shown that this is a cycloid curve
- Has to be parametrized

$$x(\theta) = \frac{1}{4gC^2} (\theta - \sin \theta)$$

$$y(\theta) = \frac{1}{4gC^2} (1 - \cos \theta)$$

- We can use  $P_1(x_1, y_1)$  and  $P_2(x_2, y_2)$  to find  $C$

# Lagrangian

## Visualizing the Solution
